YOUR BEST BUSINESS DECISION

Cloud Computing for Non-IT Professionals

This one-day workshop will allow **non-IT professionals** to understand the key concepts behind cloud computing. The course offers a unique insight into the world of cloud computing, but without any jargon.

Are you already using cloud computing? The chances are that you have been for some years. Non-IT professionals can struggle to understand the implications of the rising dominance of the cloud.

Critical business processes are already being managed through cloud computing. So understanding 'the cloud' becomes a vital part of strategic business planning.

Course Objectives:

- ⊕ Conceptual understanding of cloud computing
- ⊕ Key business uses of cloud computing
- ⊕ Understand strategic risk/reward
- ⊕ Business processes and cloud computing
- ⊕ Core collaboration

Delegates will learn:

- ⊕ How to change business processes through the use of cloud computing
- ⊕ How to improve communication with both customers and suppliers
- ⊕ How to take advantage of what cloud platforms can offer
- ⊕ About the associated business risks of the cloud and how to mitigate them
- ⊕ Better team working, collaboration, engagement and sign-off

This workshop is designed to be as interactive as possible with regular opportunities for discussion and collaborative learning.
